## INTRODUCTION

In order to provide the local school systems with a bibliography of suggested resources which would support the Project Basic Instructional Guides, the Project Basic Office and the School Library Media Services Branch, Division of Library Development and Services, agreed to jointly produce a document which suggested materials for each of the competencies in the areas of Citizenship, Survival, and the World of Work. Since each local school system has its own policies and procedures for the evaluation and selection of materials, as well as for their procurement, the document is to be used within each system according to its own criteria.

This bibliography consists of annotated listings of student-use materials (library books, films, filmstrips, kits, records, games, audio and videotapes, filmloops, transparencies, periodicals, and pamphlets) arranged according to competencies and objectives. All items listed were researched to verify their availability at the time of publication. Use of specific materials will depend on the levels of student's skill needs, abilities, and maturity. School personnel will want to preview the materials before use.

The resources listed in this document were compiled by members of the School Library Media Services Branch Staff, based on recommendations from pilot school library media specialists. The following individuals were of assistance in compiling this support document:
